

User Acceptance Testing (UAT) Template

Date	29June2026
Project Name	Network Request Management System

Project Overview

Project Name: Network Request Approval Automation using ServiceNow Workflow Studio

Project Description:

The project automates the network request process in ServiceNow. Employees can submit network requests through the Service Catalog, managers approve or reject requests, email notifications are sent automatically, and request status is updated in the Network Database.

Project Version: Version 1.0

Testing Period: 01 July 2026 to 10 July 2026

Testing Scope

Features and Functionalities Tested

- Service Catalog Request Form
- Network Database Record Creation
- Manager Approval Workflow
- Email Notifications
- Request Status Update
- Request Tracking
- Reports and Dashboard

User Stories Tested

- USN-1: Submit Network Request
- USN-2: Create Network Request Record
- USN-3: Manager Approval
- USN-4: Email Notification
- USN-5: Update Request Status
- USN-6: Track Request Status

Testing Environment

URL/Location:

ServiceNow Personal Developer Instance

Credentials:

- Username: admin
- Password: *****

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit Network Request	1. Open Service Catalog. 2. Fill request details. 3. Click Submit.	Network request is created successfully.	Request created successfully.	Pass
TC-002	Create Network Database Record	Submit a valid request.	Record is created in the Network Database table.	Record created successfully.	Pass
TC-003	Manager Approval	Manager opens approval request and approves it.	Request status changes to Approved.	Approved successfully.	Pass
TC-004	Reject Request	Manager rejects the request.	Request status changes to Rejected.	Rejected successfully.	Pass
TC-005	Email Notification	Approve or reject the request.	Email notification is sent to requester.	Email received successfully.	Pass
TC-006	Request Status Tracking	Open submitted request.	Latest request status is displayed.	Status displayed correctly.	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Approval was automatically completed without manager action during initial configuration.	1. Submit request. 2. Observe approval process. 3. Approval completed automatically.	High	Closed	Manager field configured correctly and issue resolved.
BG-002	Assigned To field was not populated initially.	1. Submit request. 2. Check created record.	Medium	Closed	Flow updated with Assigned To field mapping.
BG-003	Email notification not triggered during initial testing.	1. Approve request. 2. Check requester email.	Medium	Closed	Notification configuration corrected.
